

Who We Are

OZCREDO Corporation is a consulting company that provides comprehensive tools, training, workshops, and coaching on creative decision-making and problem solving for individuals and corporations.

This company is the Center of Creative Thinking and Unlimited Possibilities, which offers participants multiple methods for discovering and enhancing their ability to think creatively, quickly solve problems, and adapt to their rapidly changing environments.

Why It's Important

The inability to think creatively, solve problems quickly, and adapt to rapid environmental changes poses a real threat to your well-being. These inabilities can intensify stress, insomnia, anxiety, depression, performance inhibition, unhappiness, professional failure, and much more. Fortunately, we can help! The art of thinking and perception is our specialty.

Our Customers

- Individuals
- Groups
- Educational institutions
- Non-for-profit organizations
- Individuals with special needs
- Individuals or organizations that are striving to reach their full potential

How many times you have heard the phrase "thinking outside of the box"?

Guess what. There is no box.

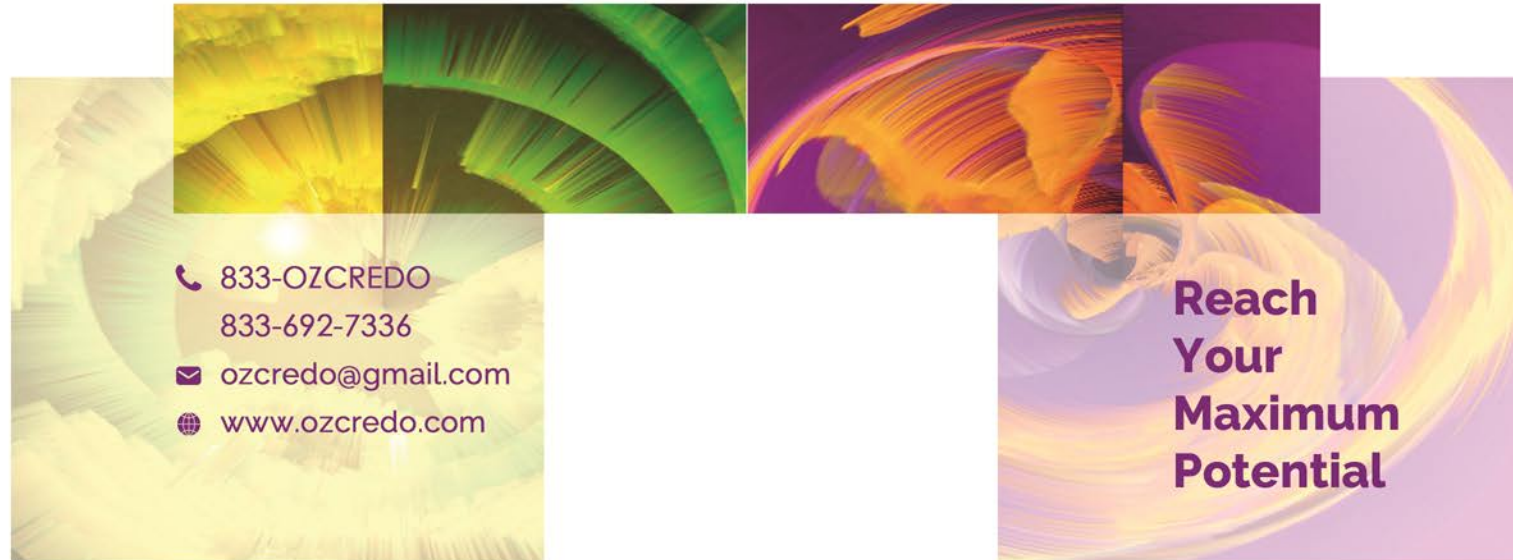

You make your own box out of narrowed vision, limited perception, biases, and misconceptions.

Mind Boosters

Mind Boosters help individuals change their perception, improve self-image, evoke emotional and behavioral responses, and spark creative thinking. Every image activates brain regions responsible for creative thinking. The high-quality canvas and semiprecious-stone mind boosters will organically become a part of your interior design. This artwork will not only enliven any room and redefine your living style but also will help you gain confidence, improve self-determination, decrease your level of anxiety, and much more based on your individual needs. This art is recommended for educational settings, health care facilities, corporate offices, business headquarters, and other environments. Wherever these outstanding art pieces are used, they help people stimulate the thought process, prevent depression, improve decision-making, build self-esteem, and much more.
